

PRESSURE REGULATORS

SERIE H601

HIGH PRESSURE REGULATOR

INDUSTRIAL
GASES

Pressure regulators of brass for high pressure (max. 230 bar, 3300 psi). Control system by rubber diaphragm. Poppet-valve (shutter) and its seat capsulated in a single element, protected by a sintered filter; this solution grants a very easy maintenance and correct functioning even in presence of impurities from the supply line. Very compact design.

APPLICATIONS:

- Technical applications;
- Automation;
- Industrial process;
- Welding and laser cutting machines;
- Heating and burning systems.

FEATURES:

- Spring loaded diaphragm;
- Recommended for non-corrosive gases;
- Suitable for oxygen use;

MATERIALS

Body	Brass
Bonnet	Brass
Seals	PTFE
Diaphragm	Fairprene
Internal parts	Brass
Shutter	PTFE

TECHNICAL DATA

P. max Intet	230 Bar
Renge pressure out	5-25 / 5-55 Bar
Flow rate	45 m ³ /h
Leak rate	10 cm ³ /h secondo ISO9090 / according to ISO9090
Weight	850 gr / 1.87 lb
Working temp	-20°C to +60°C
Conformity to Directive	ISO2503 – ISO5171

SPECIFICATIONS:

Inlet port	Norme UNI - NEF - DIN - BS
Outlet port	1/4" SAE
Weight	1,3 kg
Temperature range	-30°C to +74°C
